

EDUCATION

- Parul University** Vadodara, IND
Computer Science and Engineering; GPA: 8.19 Jun. 2022 – May. 2026
- Parul University** Vadodara, IND
Diploma in Neural Networks and Deep learning; GPA: 8.13 Jun. 2023 – Jun. 2024

EXPERIENCE

- Eleva** Vadodara, India
Full Stack Engineer Jan 2026 - May 2026
 - Test Planning & Execution:** Designed, planned, and executed manual and functional test cases to validate application quality, usability, and system reliability.
 - Software Testing:** Performed functional, regression, integration, and compatibility testing to identify defects and improve software performance across multiple environments.
 - Non-Functional Testing:** Worked on load, stress, accessibility, and security testing concepts to ensure application stability and performance optimization.
 - Bug Tracking & Debugging:** Identified, documented, and tracked software defects using debugging techniques while collaborating with developers to resolve issues efficiently.
 - SDLC Knowledge:** Applied understanding of Software Development Life Cycle (SDLC) and Software Testing Life Cycle (STLC) methodologies during testing and deployment phases.
 - Analytical & Problem Solving Skills:** Demonstrated strong analytical abilities by interpreting testing results, preparing reports, and improving overall software quality assurance processes.
- CDOE** Vadodara, India
Content Writer Jan 2014 - Oct 2016
 - Content Creation:** Created engaging and SEO-friendly content for blogs, websites, and social media platforms to improve audience reach and brand visibility.
 - Research & Analysis:** Conducted detailed research on industry-related topics to produce accurate, informative, and high-quality content within deadlines.
 - SEO Optimization:** Implemented SEO strategies including keyword optimization, meta descriptions, and content structuring to enhance search engine rankings.
- Plasmid Innovations** Remote
ML Engineer Apr 2023 - Jun 2023
 - Machine Learning Model Development:** Developed and trained machine learning models using Python, Scikit-learn, and TensorFlow for predictive analysis and data-driven solutions.
 - Data Preprocessing:** Performed data cleaning, preprocessing, and feature engineering on structured and unstructured datasets to improve model accuracy and efficiency.
 - Model Evaluation:** Evaluated model performance using metrics such as accuracy, precision, recall, and F1-score while optimizing hyperparameters for better results.
 - Deployment & Collaboration:** Collaborated with development teams to integrate machine learning models into applications and participated in testing, debugging, and deployment processes.

PROJECTS

- Email Triage OpenEnv:** Developed an AI-powered Email Triage system using OpenEnv to automatically classify, prioritize, and route emails based on content and urgency.
- AI Resume Evaluation System:** Engineered an AI-driven screening system using Gemini LLM to auto-generate candidate scoring reports.
- Hack & Hired:** Built a MERN-based recruitment platform with JWT authentication, REST APIs, and AI-powered skill assessments.

PROGRAMMING SKILLS

- Languages:** Python, JavaScript, SQL, Java, HTML/CSS
- Technologies:** Selenium, Postman, REST APIs, Git/GitHub, AWS
